

# JOPRO Cart

To be used together with a specific truck.  
One cart - one truck.

### Maximum truck fleet uptime

A battery change takes only 2-4 minutes.

### Provides a safe working environment

Lockable castors that secures the position during battery change.

Battery latch that holds and secures the battery when moving.

### Sturdy design

Strong and durable rollers in the battery bed.

Robust and stable construction.

Adjustable 20 mm in height to compensate for wear on the truck tires.

### Options

**+Winch** A winch makes the battery pulling easier and more ergonomic.

**+Rail** Rail-guided version to serve several trucks. The cart is used to transfer the batteries to the roller beds for charging.

### Specifications

Battery weight:	max. 400 kg per battery
Battery roll-out height:	min. 110 mm

The truck's battery compartment has to be equipped with a roller bed.
